1. The models to focus on

Google's current Decision Maker model list contains these main families. The table preserves the earlier section's model names, parameter counts, architectures, and listed precision / format, with model-card/source links added.

Model / variant	Parameters	Architecture	Listed precision / format	Model card / source
EmbeddingGemma 1	300M	Bi-encoder	Mixed INT4 + INT8	Decision Maker list EmbeddingGemma card
EmbeddingGemma 2	270M	Bi-encoder	FP16	Decision Maker list EmbeddingGemma card
EmbeddingGemma 2 Text-Vision	270M class	Bi-encoder	FP16	Decision Maker list EmbeddingGemma 2 overview
Laya S256	149M	Cross-encoder	FP32	Decision Maker list
Laya S512	149M	Cross-encoder	FP32	Decision Maker list
GLiNER2.5-Decide S256	166M	Cross-encoder	FP16	Decision Maker list
GLiNER2.5-Decide S512	166M	Cross-encoder	FP16	Decision Maker list
Gemma 4 E2B	2B class	Generative decoder	INT4	Decision Maker list Gemma 4 card
Gemma 4 E4B	4B class	Generative decoder	INT4	Decision Maker list Gemma 4 card

Source note: The table preserves Section 1's earlier summary. Use the official Decision Maker model list as the primary source for the task's exact model assets and supported configurations.
