Decision Models: Downloadable Weights, Image Support & ONNX Availability

Original two-table structure retained. ONNX links are included where a matching Hugging Face/GitHub export was found. “Not found” means not located in this review, not proof that no export exists. Some exports are community conversions, not official releases.

ONNX availability does not guarantee image-encoder coverage, runtime compatibility, or NPU support. For multimodal models, verify that the export includes vision components and preprocessing; also check model revision, license, parity, opset, and target execution provider.
